IT Trainers Training Programs at ITSIT

The Indian Trainers' Society in Information Technology (ITSIT) offers four specialized training programs under the "Training of Information Technology (IT) Trainers" initiative, designed to develop future IT trainers across multiple domains. These programs follow a structured four-year path with four distinct levels: O-Level, A-Level, B-Level, and C-Level, each lasting one year. Every year is divided into two semesters and four quarters, ensuring a comprehensive and step-by-step learning approach.

Overview of Training Programs at ITSIT

1. Training of IT Trainers - Speciality in Software and Web Development Technologies:

This program is dedicated to preparing IT trainers with a focus on modern software development methodologies, programming languages, and web development technologies. Trainees will master essential tools and frameworks, enabling them to deliver high-quality training on front-end, back-end, and full-stack development. Over the course of four years, they will progress from foundational programming skills to advanced software architecture and project management.

2. Training of IT Trainers - Speciality in Digital Art, Graphics, Animation, Video Editing, and Digital Media Specializations:

Aimed at nurturing creative IT trainers, this program equips participants with technical expertise in digital art, graphic design, 2D/3D animation, and video editing. The curriculum covers tools like Adobe Creative Suite, Blender, and industry-standard animation techniques, along with media management, to prepare trainers who can mentor others in visual storytelling and digital content creation.

3. Training of IT Trainers - Speciality in IT Governance, Cyber Security, Audit, Cyber Vigilance, Defence, and Security Audit:

This program focuses on creating expert trainers in IT governance, cyber security, and audit practices. Trainees will acquire advanced knowledge of cyber threats, risk management, security frameworks, and defense protocols. The curriculum emphasizes real-world scenarios, cyber defense tactics, and ethical hacking, ensuring that trainees can later teach these critical skills to budding IT professionals.

4. Training of IT Trainers - Speciality in Digital Marketing:

Designed for individuals looking to specialize in digital marketing, this program covers topics such as SEO, PPC, social media marketing, content marketing, and data analytics. Over four levels, trainees will build expertise in crafting effective digital strategies, managing campaigns, and interpreting marketing data. This specialization prepares trainers to lead digital marketing teams and train the next generation of marketing experts.

These programs, offered by ITSIT, are structured to foster expertise in each respective domain, ensuring that trainees develop both technical and teaching skills.

A Career with Power, Stability and Global Acclaim

Taking on a career as an IT trainer with ITSIT- Indian Trainers' Society in Information Technology; is a journey that will lay the foundation for a future filled with growth, stability, and excellence. Our Training of IT Trainers programs, designed with global standards in mind, are more than just an educational experience- they are a pathway to transforming your career into a source of lifelong success and fulfillment. The strength of the Training of IT Trainers programs lies in their structured approach and

comprehensive design. Whether you specialize in Software Development, Cyber Security, Digital Media or Digital Marketing, each path offers a four-year progression from foundational to advanced skills. This ensures not only deep-rooted technical expertise but also mastery in imparting that knowledge to others. With ITSIT, your career isn't just about staying relevant; it's about leading the industry and consistently delivering excellence.

Our philosophy is anchored in powerful principles that ensure a stable and rewarding career:

- **Persistence and Consistency:** Success in IT training comes from persistence- remaining dedicated to your chosen field and following through on your career goals. By maintaining focus and consistency, you ensure a steady growth path in the IT industry.
- **Expertise in Your Field:** We foster a profound relationship with your chosen specialization, ensuring that every aspect of your training helps you generate meaningful results, whether through developing impactful websites or mastering cybersecurity strategies. Expertise in these areas will make you an indispensable force in the industry.
- **Mastery and Depth of Knowledge:** You will gain not only technical knowledge but the practical and teaching skills required to impart that knowledge. This means you won't just understand the subject-you'll become a leader, capable of shaping the next generation of IT professionals.
- **Ethical and Continuous Development:** As an IT trainer, you'll develop a deep sense of responsibility. Grounded in ethics, values, and continuous self-learning, you will stay ahead in your field, always growing and evolving alongside the ever changing tech landscape.
- **Resilience against Challenges:** The complexity and uncertainty of the IT world require trainers who are resilient. At ITSIT, we ensure you are prepared for the professional and personal challenges that arise. You'll be empowered with access to protect yourself from emotional, financial, physical and psychological vulnerabilities, ensuring your career remains strong and secure.
- **Industry Relevance and Contribution:** With a strong connection to industry standards, our programs ensure that you remain aligned with real-world scenarios. Whether it's leading cybersecurity initiatives or shaping digital marketing strategies, you will serve the industry with confidence, making tangible contributions that reflect your expertise.
- **Transformational Leadership:** Beyond technical skills, we emphasize the importance of coaching and leadership. You will develop the ability to self-coach, continuously transforming yourself for ongoing growth and expansion in your field. Participate in globally acclaimed coaching and leadership programs, seminars and activities. This will also enable you to inspire and uplift others, creating a ripple effect of excellence in your community.
- **Practicing Best Practices:** At ITSIT, we believe in the power of best practices. By letting go of out-dated methods that hold you back and adopting innovative approaches, you will continuously transform and expand your capabilities.
- **Teamwork and Collaboration:** In the dynamic world of IT, collaboration is the key. You'll learn to harness the power of teamwork to produce outstanding results, further amplifying your impact in your professional environment.
- **Community Contribution:** Finally, as a trainer, you have the unique opportunity to give back. By sharing your knowledge and achievements, you can empower others to pursue excellence, creating a lasting legacy in both the IT world and society at large.

The Reality and Reliability of a Strong Career

By joining ITSIT's Training of IT Trainers programs, you are not just preparing for a job- you are creating a career that offers stability, growth, and global recognition. This program is designed to give you the tools and mindset necessary to thrive in an industry that is both challenging and rewarding. You will be equipped not only to excel but also to ensure long-term reliability and success in your career. Your future starts here - with the persistence, expertise and mastery that will guide you toward a career full of power, stability, and global recognition. Join ITSIT and become a leader who shapes the future of IT with excellence.

Who can apply for the ITSIT Training of IT Trainers program?

1. Students Who Have Completed 10+2

- **Who can apply:** Students fresh out of senior secondary school (10+2) who want to begin their professional IT training early.
- **Why apply:** These students can jumpstart their career by gaining technical skills and avoiding delays caused by lengthy formal education programs.

2. Graduates from Any Discipline (B.A., B.Sc., B.Com.)

- **Who can apply:** Individuals holding a degree in non-technical fields such as Arts, Science or Commerce.
- **Why apply:** Graduates looking to shift their career into IT or teaching and who need structured technical knowledge to make that transition.

3. Graduates with IT Backgrounds (BCA, B.Sc. IT, B.Sc Science, B.Tech Computer Science and Engineering, B.Tech-IT, B.Tech Other Branches)

- **Who can apply:** Students who have completed undergraduate degrees in computer science, information technology, or related fields.
- **Why apply:** Those with a foundational knowledge of IT who want to specialize in IT training and teaching.

4. Post-Graduates

- **Who can apply:** Individuals who have completed post-graduate degrees in any field but want to venture into IT training.
- **Why apply:** Post-graduates looking to add a practical IT teaching specialization to

their academic qualifications.

5. Long-Term Interns

- **Who can apply:** Individuals who have completed long-term internships in IT and are seeking formal training to solidify their experience.
- **Why apply:** Those who want to combine practical work experience with structured, formal training in IT teaching.

6. People Pursuing Learning and Work Experience Simultaneously

- **Who can apply:** Individuals who want to learn while working part-time or full time.
- **Why apply:** Those who value gaining technical expertise while simultaneously gathering work experience to enhance their practical skills.

7. People Who Prefer Training and Work over Formal Education

- **Who can apply:** Individuals who prioritize practical training and work experience over traditional academic degrees.
- **Why apply:** Those who want to invest their time in career development rather than pursuing long-term formal education.

8. Individuals Who Want to Invest Time in Self-Development Rather than Unrelated Jobs

- **Who can apply:** People who want to focus on skill-building and career planning instead of taking up irrelevant jobs.
- **Why apply:** Those aiming to invest time wisely in career-preparing activities rather than drifting into unrelated work for financial needs.

9. Individuals Looking to Make a Focused Investment in Their Future

- **Who can apply:** Those who want to make deliberate and wise choices in their career development by spending time and money on structured, impactful programs.
- **Why apply:** People who believe in early investment in their career and see value in IT training as a long-term strategy for professional growth.

10. Individuals Who Prefer a Career Track Over Waiting for Degree Completion

- **Who can apply:** Students or young professionals who want to adopt a clear career path early rather than waiting to finish multiple academic degrees.
- **Why apply:** Those who want to secure a well-defined career in IT training, with global recognition, instead of hoping to find their path after traditional degree completion.

Fee and initial investment

The ITSIT Training of IT Trainers program requires an initial investment only during the first year. The fee for each quarter (3 months) is ₹19,500, with a total of four quarters in the year. This structured fee system ensures that participants receive high-quality training and resources throughout the year. Additionally, a fee waiver scholarship is available for individuals who meet the scholarship criteria, which includes academic and practical performance evaluations. As part of the scholarship selection process, candidates must successfully pass an interview with the ITSIT admission body, offering a merit-based opportunity to reduce their financial investment while gaining access to the full training program.

Stipend and Incentive

A stipend is provided to participants after successfully completing the O-Level of the ITSIT Training of IT Trainers program. This stipend serves as financial support and an incentive to encourage further growth and commitment to the program. As trainees progress through each level and demonstrate their personal and professional development, particularly through the results they produce during internships, their stipend is generally increased. This approach rewards both consistent effort and tangible achievements, ensuring that trainees are motivated to continuously enhance their skills and knowledge as they advance through the different levels of the program.

Invitation

Are you ready to embark on a journey of extraordinary self-learning, embracing complex and ambiguous technologies? Do you dream of becoming a catalyst for positive change and contributing to the world through exceptional IT skills? If so, we invite you to be a part of the Training of Trainers' Program at ITSIT – a transformative experience like no other.
