

RESTORING

Restoring is a tool of champion inside of their practice of best practices to win the game. It is an event when you can smile on as it is an opportunity to get forward and create a new possibility inside of your expansion and performance. You can further create a pleasant environment around your coach or committed listener. It is not a restoring if you are disempowered, guilty and the committed-listeners and coaches are not left with empowering experience. It is a communication of accountability to accountability. It's a communication of someone having greatness with another person who is great. It's communication of a possibility with another possibility. There exists no internal state or identity when restoring.

Restoring steps:

1. Who goes to whom (Player to coach or coach/ buddy/ somebody else in group holds for account)
2. What is missing-action or no-action or out integrity or broken word? What and where is communication with-hold? What is displaced? In which possibility is the breakdown? Who you are being when the breakdown happened?
3. What is its impact on player and probable almost future? What is impact on other people in the same possibility? What is impact on physical and mental space? Impact on possibility at group level and institution? Probable almost future at institution and group level?
4. What is the fresh promise or declaration? What could be the possible (new possibility) ways of being you invent that inspires you? What would be the new actions visible? What would be the new actions and future would look like if new possibility is intact? What would be the score board/ new outcome you take on to produce in the world of performance?
5. What would be the structures? New alignments and enrolments? What would be structure of existence/ noting down/ scheduling and where would be the strong and timely communication maintained?

Note:

- a. if you are restoring someone or someone comes to you to restore then you must be present to your own possibility.
- b. The person who is going to restore must ensure the space of authentic and empowering communication.
- c. Reaction or persistent complaint at the time of restoring is like infectious, un-sterilized and dirty instruments and operation theatre (OT) at the time of surgery performed by a surgeon (here surgeon does not denotes coach or player; it denotes only a situation).
- d. Let the people be present before starting a restoring conversation.
- e. Every must be left with great experience at the end of restoring conversation.
